# VETERAN'S DAY COMMEMORATION

Courtesy of Florence Morning News

Veterans were recognized at FDTC with a commemoration service which included the flag raising by the US Navy, US Army, and the USMC. After the national anthem, Rep. Billy Houck recognized the services that veterans have provided.

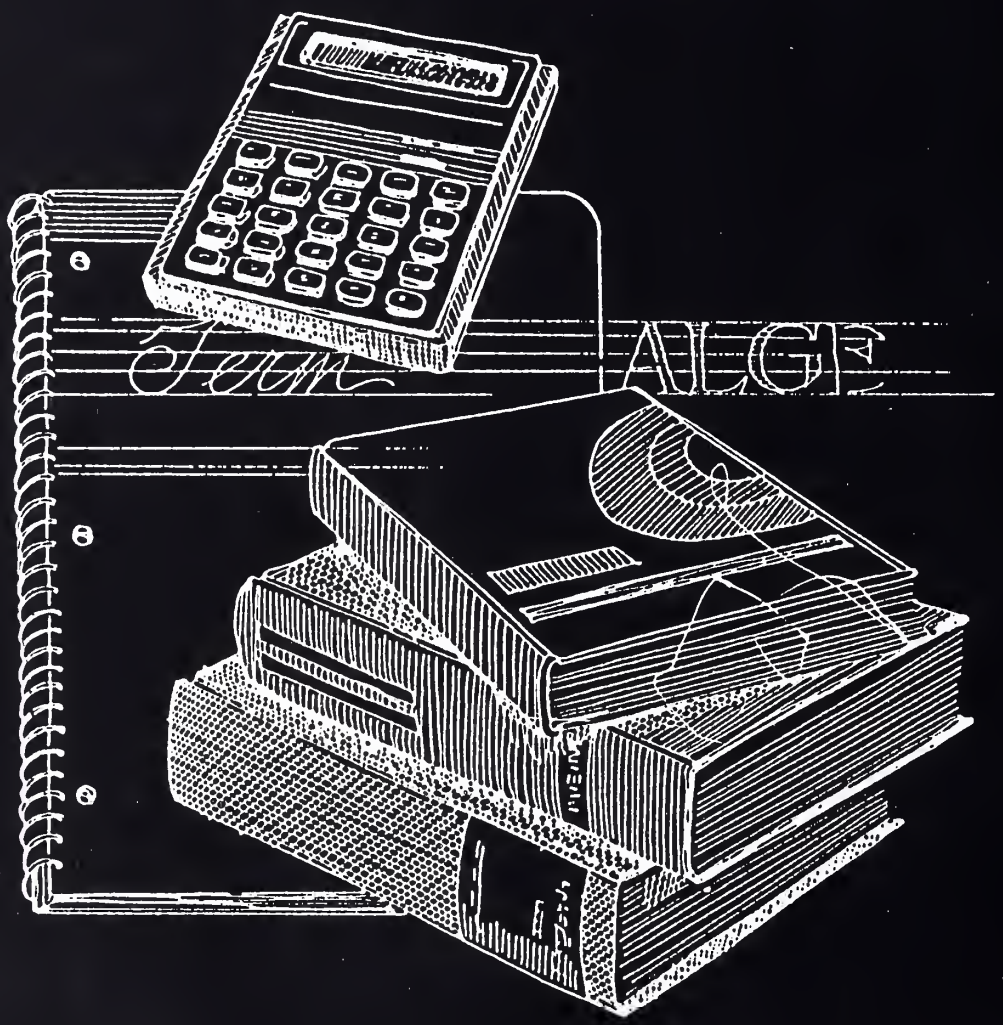
Four heads can be better than one, well, maybe.

# ARTS AND SCIENCES



# ASSOCIATE IN ARTS/SCIENCES

This program prepares the student to transfer specific courses or to transfer the degree in its entirety to a four-year college. The degree stresses communication, social and natural sciences, and humanities.

# CRIMINAL JUSTICE TECHNOLOGY

This program prepares students for a variety of positions in the criminal justice field. Employment opportunities for graduates exist in the areas of probation and parole, detention, juvenile delinquency, crime prevention, and law enforcement.

# *DIRECT CARE SPECIALIST*

This program trains the students to provide a range of services from direct physical care to the implementation of social programs for the elderly, the mentally retarded, or others unable to care for themselves.

# HUMAN SERVICES

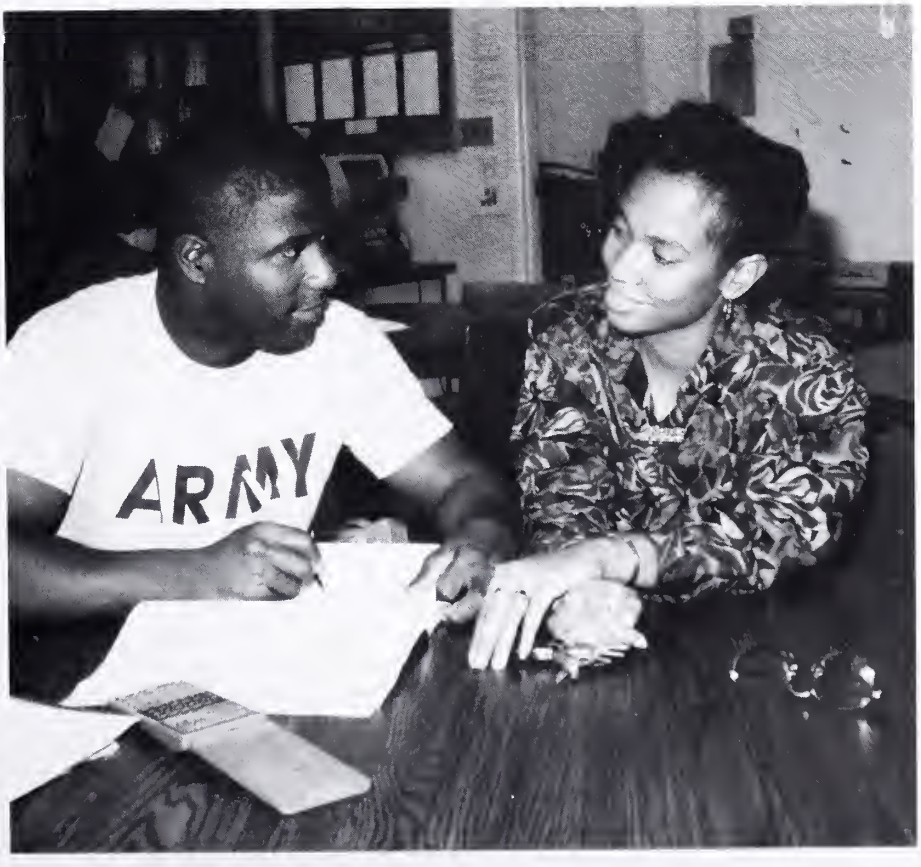
This program trains students to perform services on a person-to-person basis. Graduates qualify for employment as a rehabilitation assistant, health education assistant, youth counselor, daycare specialist, teacher aid specialist, or mental retardation specialist.

# INDEPENDENT STUDY

Independent Study at Tech is designed for students whose personal situations make it difficult or impossible to enroll in on-campus courses. This unique program allows maximum flexibility and offers several exceptional features.

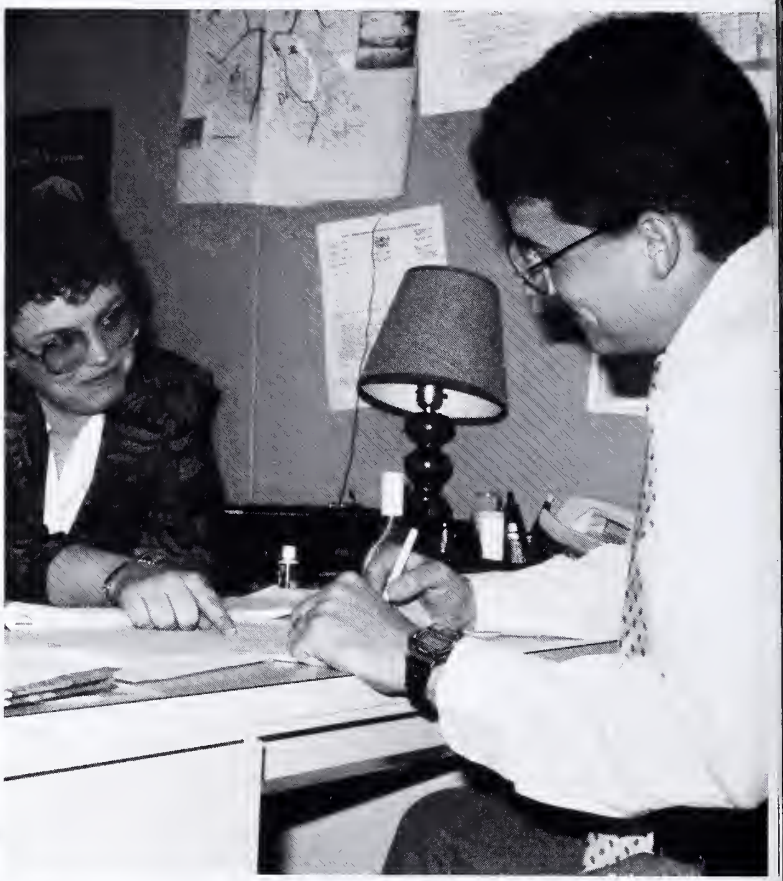
# TRANSITIONAL STUDIES

Courses are designed to strengthen students' skills in English, vocabulary, reading, mathematics, study skills, and test-taking strategies before they take curricular courses requiring these skills.



# LEGAL ASSISTANT/PARALEGAL

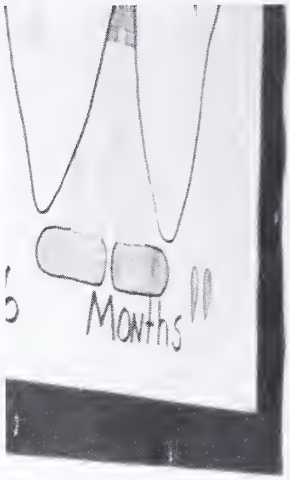
This program prepares the student to work as an assistant to an attorney with research and other legal tasks under his/her direction.

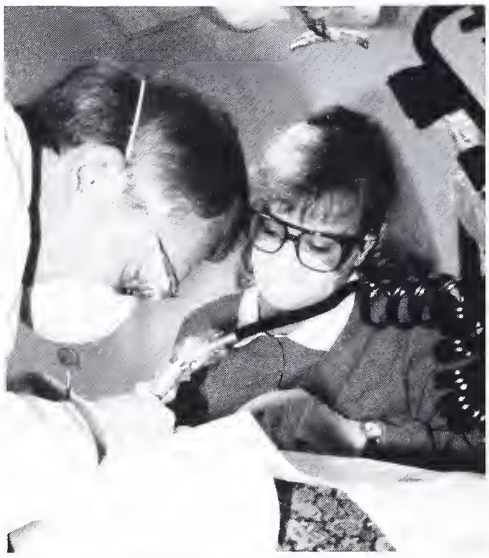


# HEALTH STUDIES

# DENTAL ASSISTING

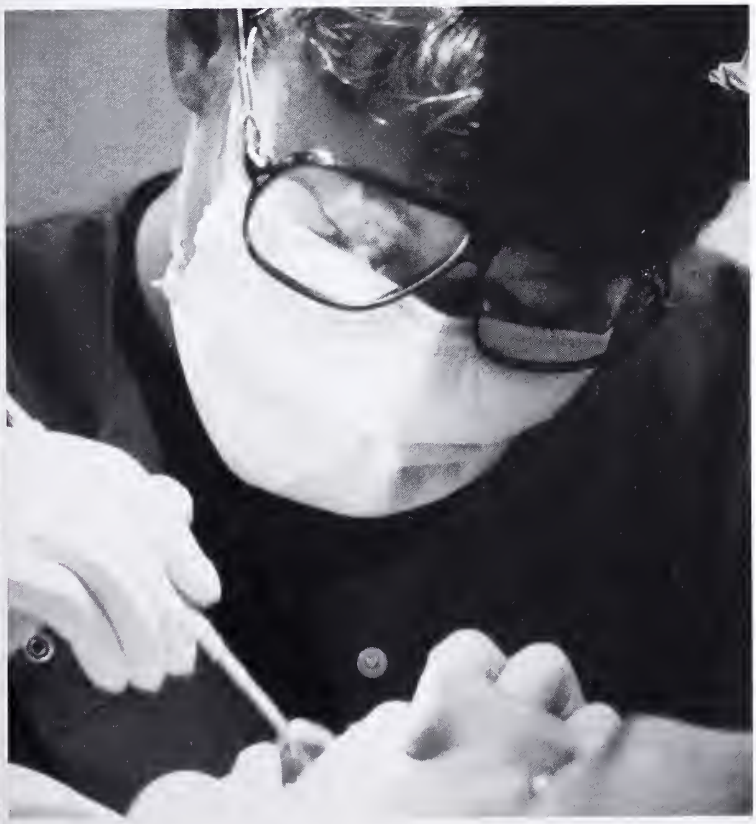
This program uses classroom study, clinical experiences and work experience to train dental assistants. Dental assistants may be employed in a private dental office, dental clinic, or public health agency.





# DENTAL HYGIENE

This program uses classroom study and clinical experience to train dental hygenists. Dental hygenists may be employed in dental offices, dental clinics, public health agencies, and educational institutions.



# HEALTH INFORMATION MANAGEMENT

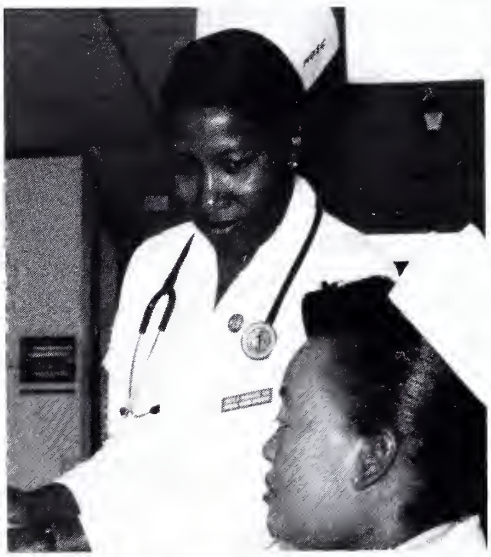
The curriculum is designed to prepare students to work in a health record service located in hospitals, health centers, consulting firms, medical research institutions, pharmaceutical companies, long-term care institutions, and other health related facilities.

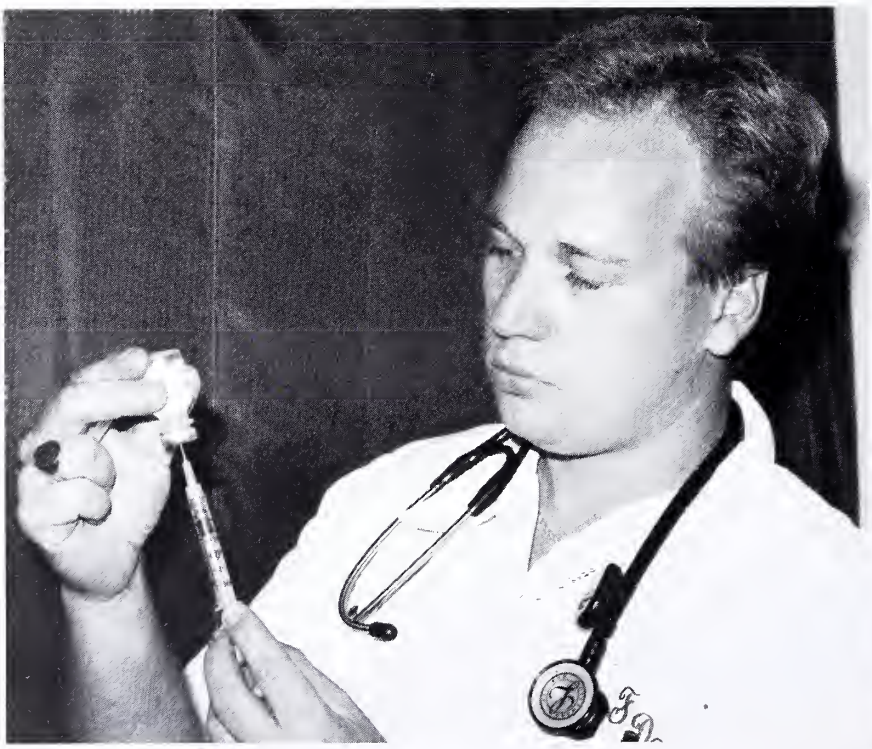
# MEDICAL LABORATORY TECHNOLOGY

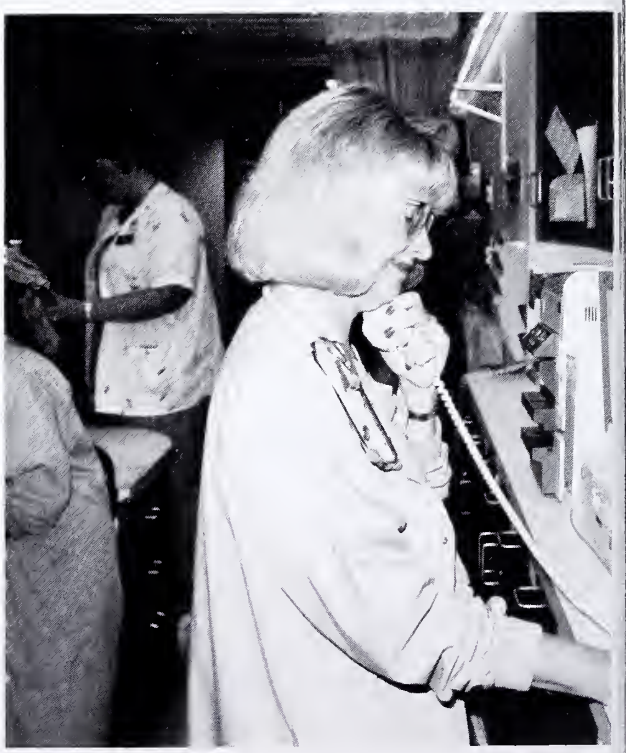
Students training includes classroom study, campus laboratory sessions, and experience applying learned skills in hospital clinical laboratories. Program graduates possess the knowledge and skills required to work primarily in hospital clinical laboratories and various other medical settings.

# NURSING

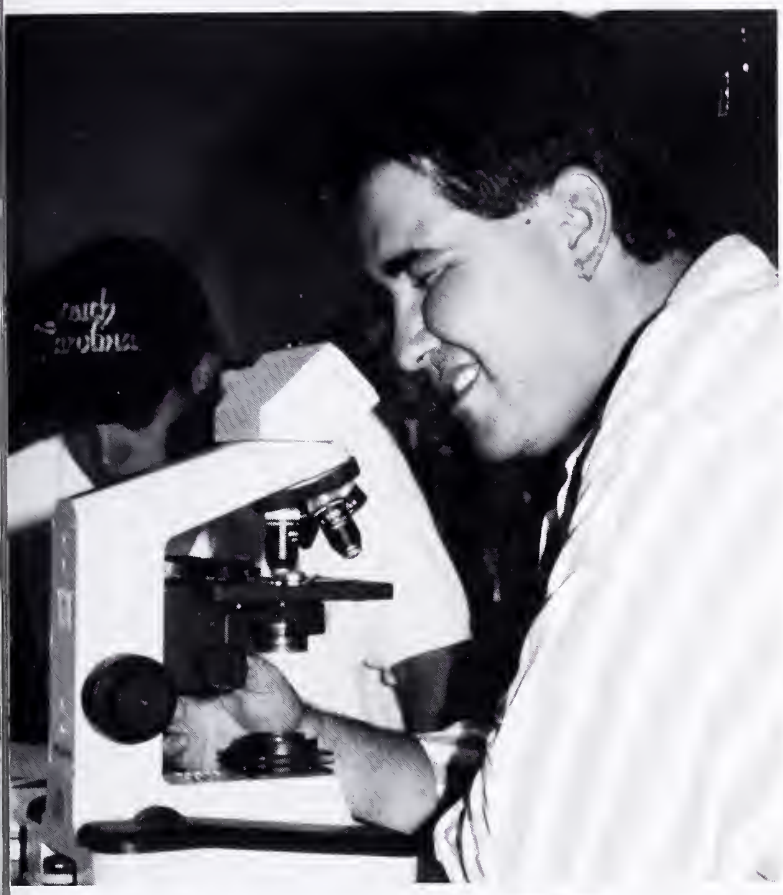
The graduate of the Associate Degree in Nursing program is prepared to take the National Council Examination (NCLEX-RN) for registered nurse licensure and perform effectively as an entry level staff nurse in hospitals, clinics, extended care facilities, or physcians offices.







# PHYSICAL THERAPY ASSISTANT



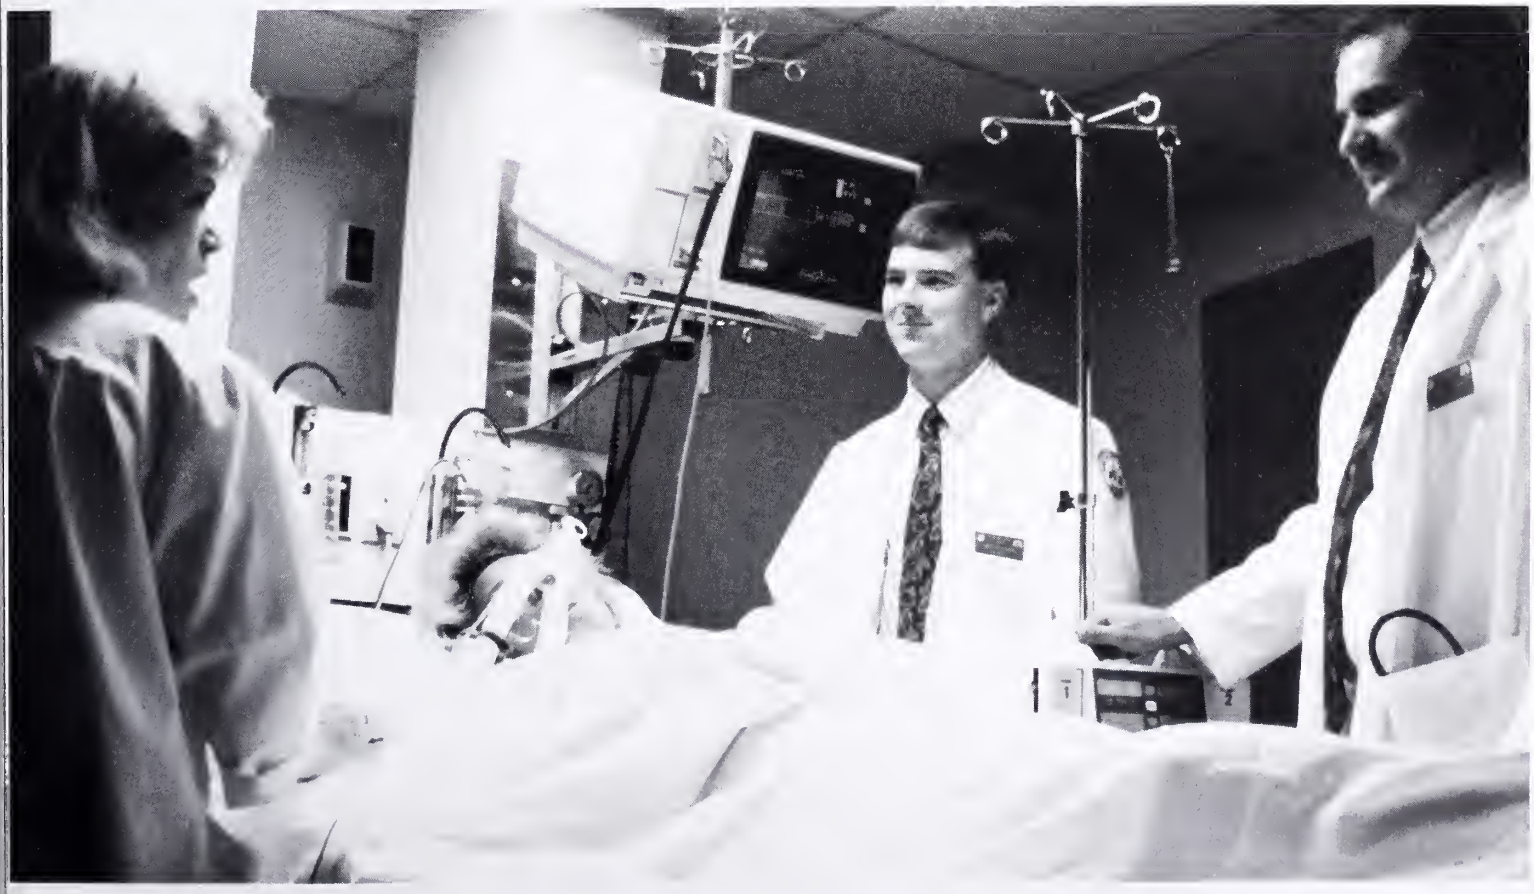
A unique program offers the first year of the program at FDTC and the second year is completed at Trident or Greenville Technical College.

# RADIOLOGIC TECHNOLOGY

Radiologic technologists use x-ray equipment and other imaging devices to aid physicians in patient diagnosis. The objectives of the curriculum are designed to train students in the science of radiography through a comprehensive educational program consisting of classroom and clinical instruction.

# RESPIRATORY CARE

Respiratory Therapists work closely with the physician and nurses in the treatment and diagnosis of various breathing disorders. Emphasis is placed on "advanced" respiratory care procedures. Respiratory therapists are required to have an in-depth knowledge of heart-lung physiology. Students will receive classroom, laboratory, and hospital instruction.



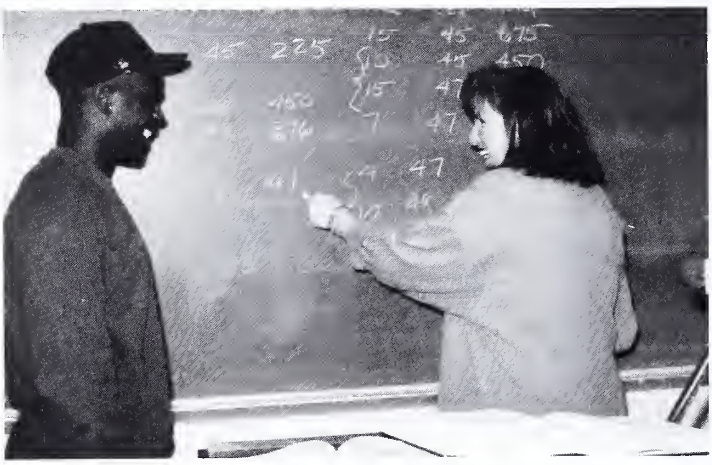
# SURGICAL TECHNOLOGY

This program uses classroom experience to prepare students to function in the role of a surgical technologist. Graduates possess skills which prepare them to work in operating rooms, ambulatory surgery units, physicians' offices, emergency rooms, and labor/delivery areas upon passing the certification exam.

# TECHNOLOGICAL STUDIES

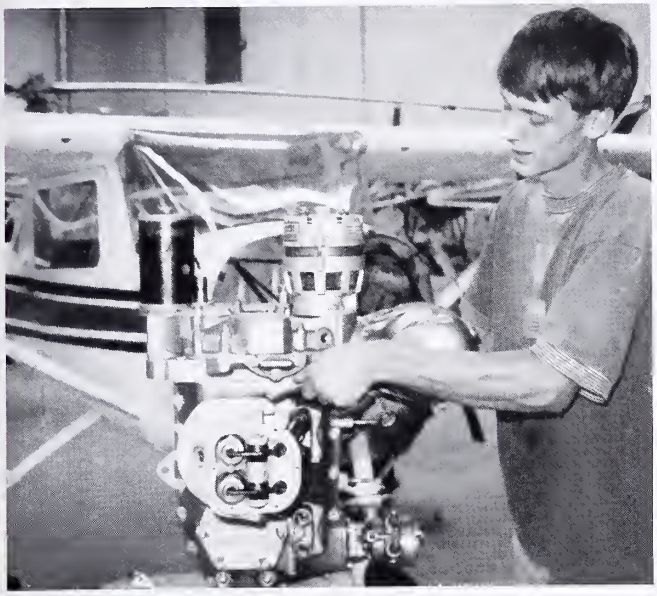
# ACCOUNTING

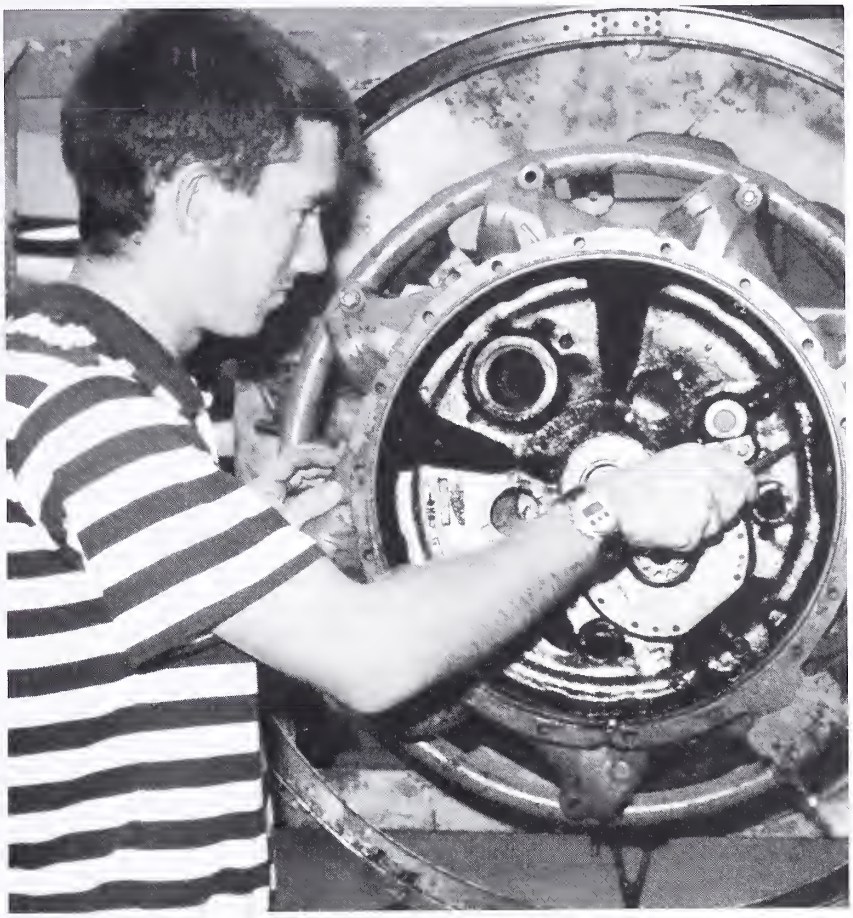
This program uses classroom and laboratory experience to provide students with accounting skills. Graduates are prepared to be part of the management team in business, government, and industry.

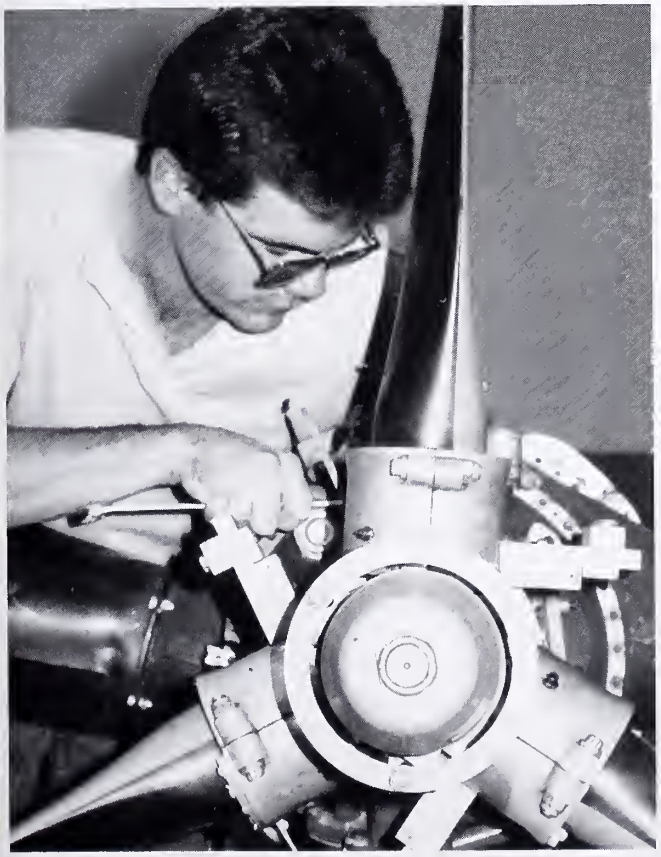


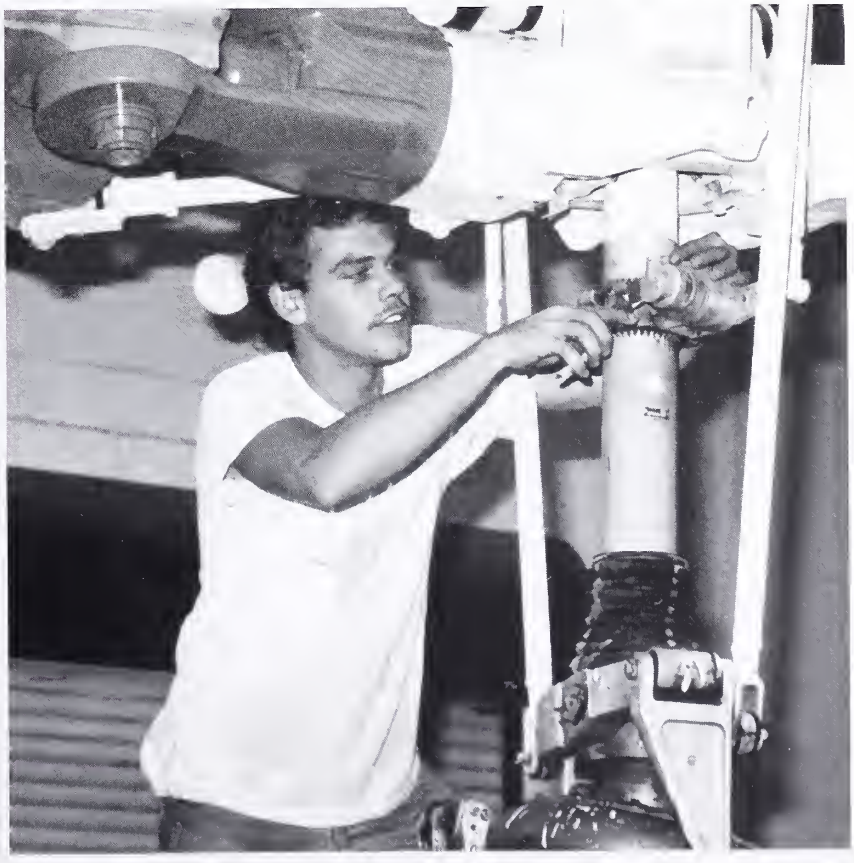
# AIRCRAFT MAINTENANCE TECHNOLOGY

This program provides training and manual skills in servicing, testing, diagnosing, and rebuilding both the airframe and powerplant units and all related components.

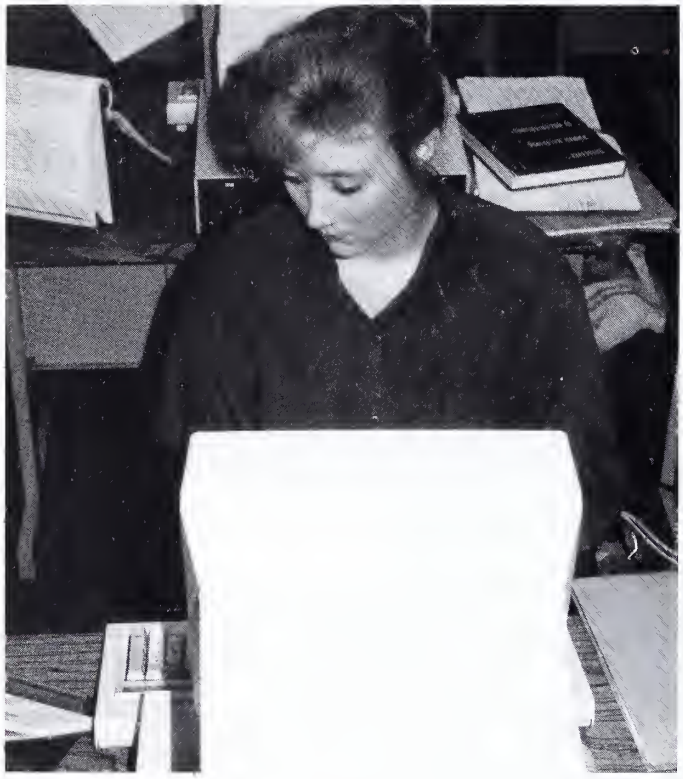




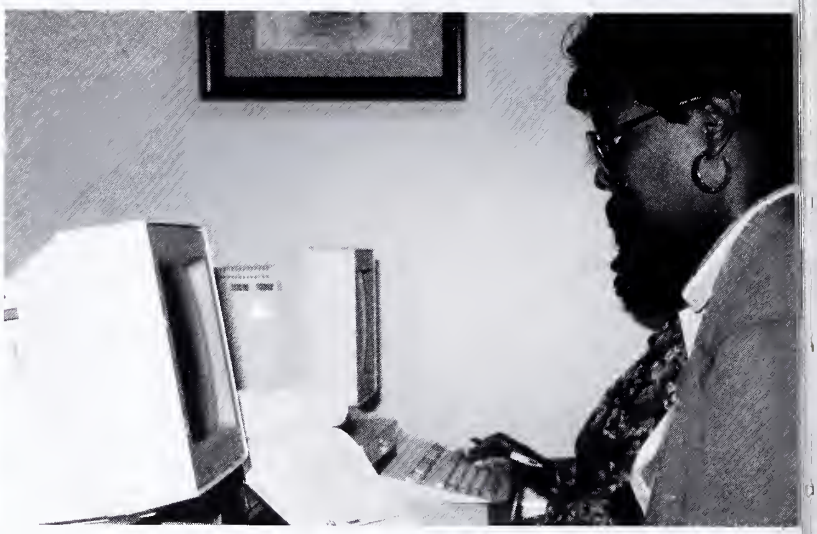




# AUTOMATED OFFICE

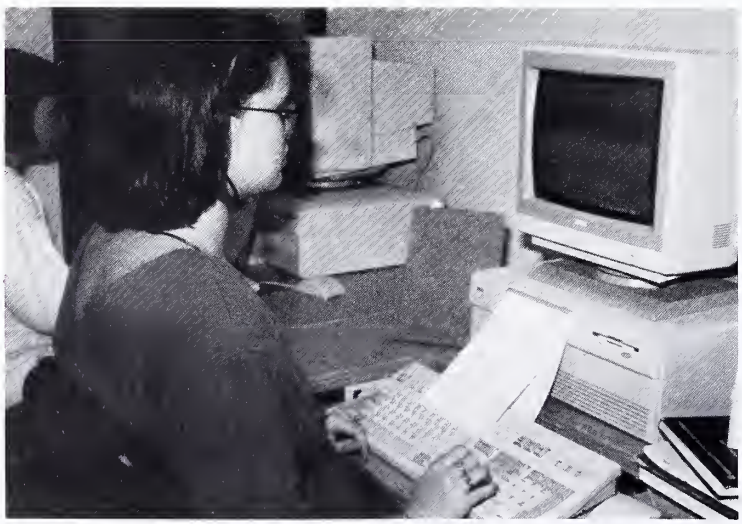


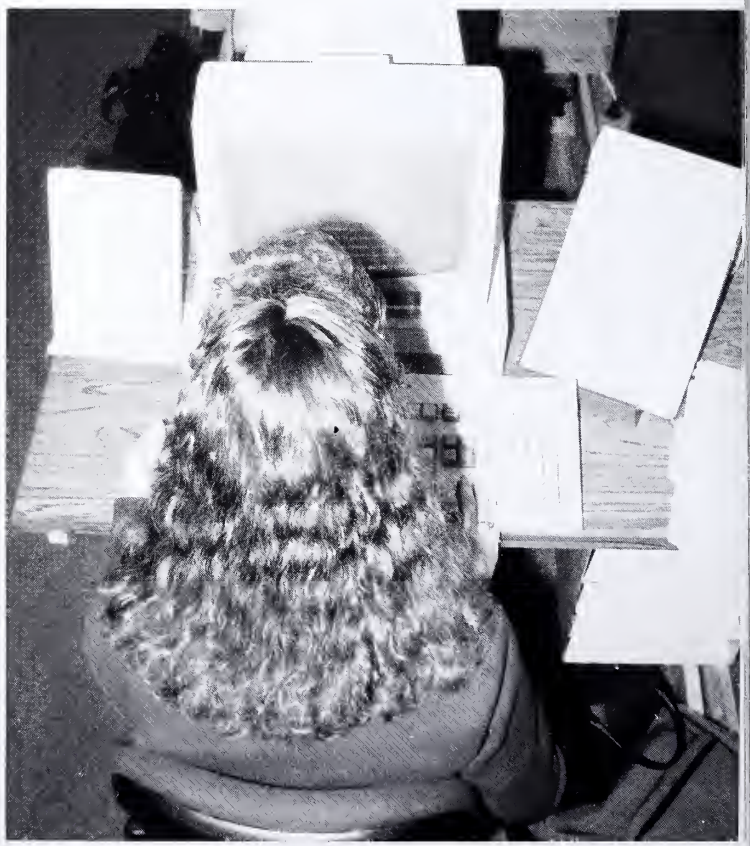
This program prepares graduates to be office clerks and typists.



# HEALTH CARE SECRETARY

This curriculum is designed to prepare students to work in hospitals, nursing homes, physicians' offices and other health care settings. General secretarial functions, maintenance of patients charts, transcription of doctors' orders, operation of various equipment, and a professional level of interpersonal skills is stressed in this program.





# AUTOMOTIVE TECHNOLOGY

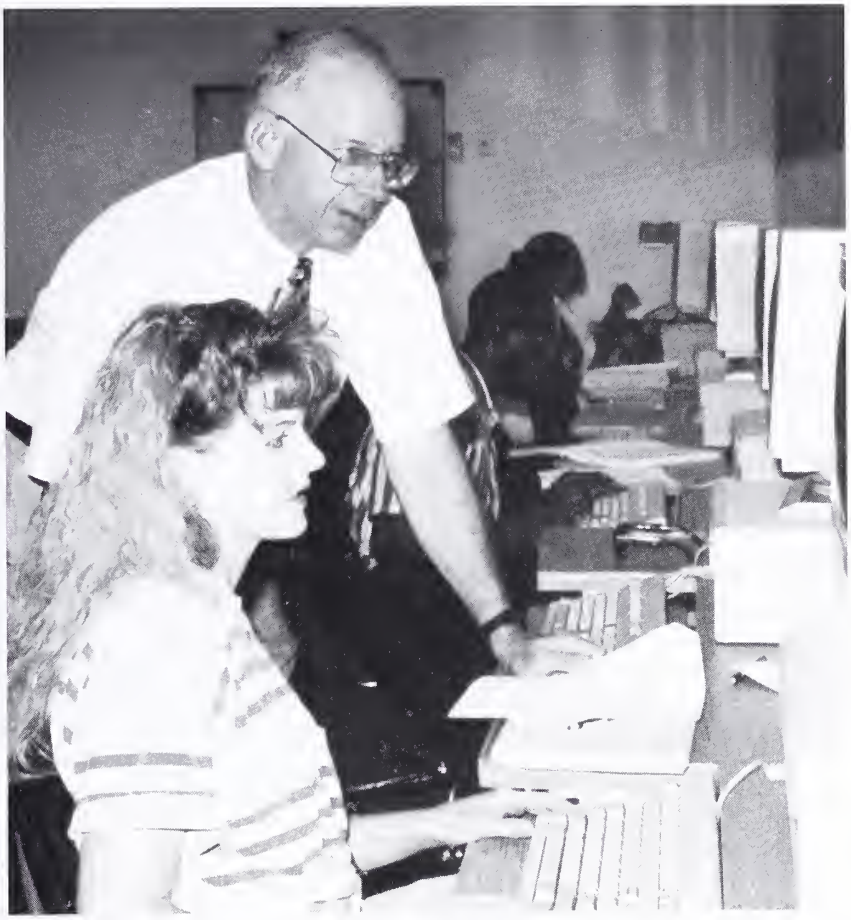
This program trains automotive technicians to service vehicles including maintenance and problem diagnosis. Employment opportunities are available in the automotive or trucking industries and their related fields.

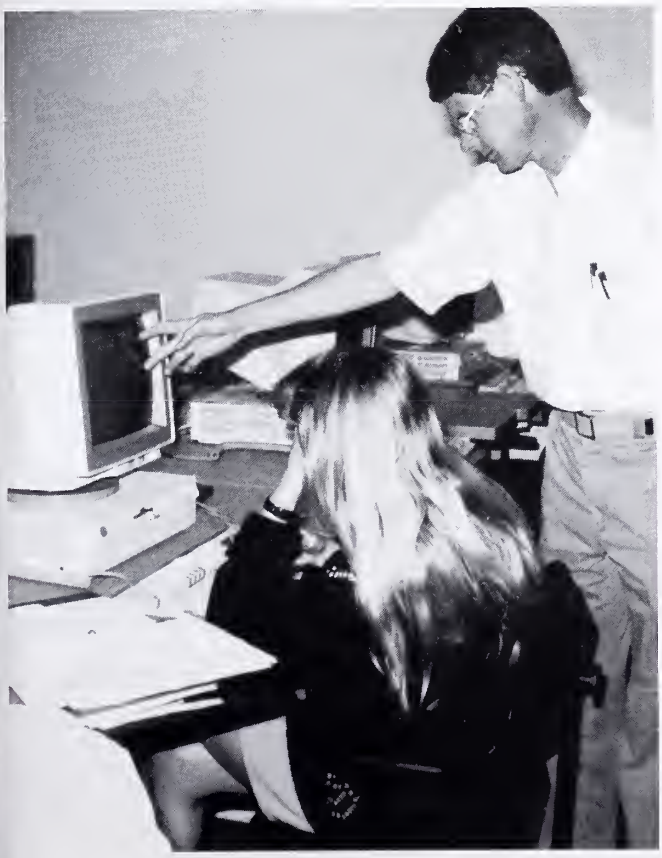
# CIVIL ENGINEERING TECHNOLOGY

This program trains students to perform a variety of civil technological functions. Graduates are prepared to work in the construction field in the areas of planning, surveying, and overseeing construction and maintenance of structures and facilities.

# COMPUTER TECHNOLOGY

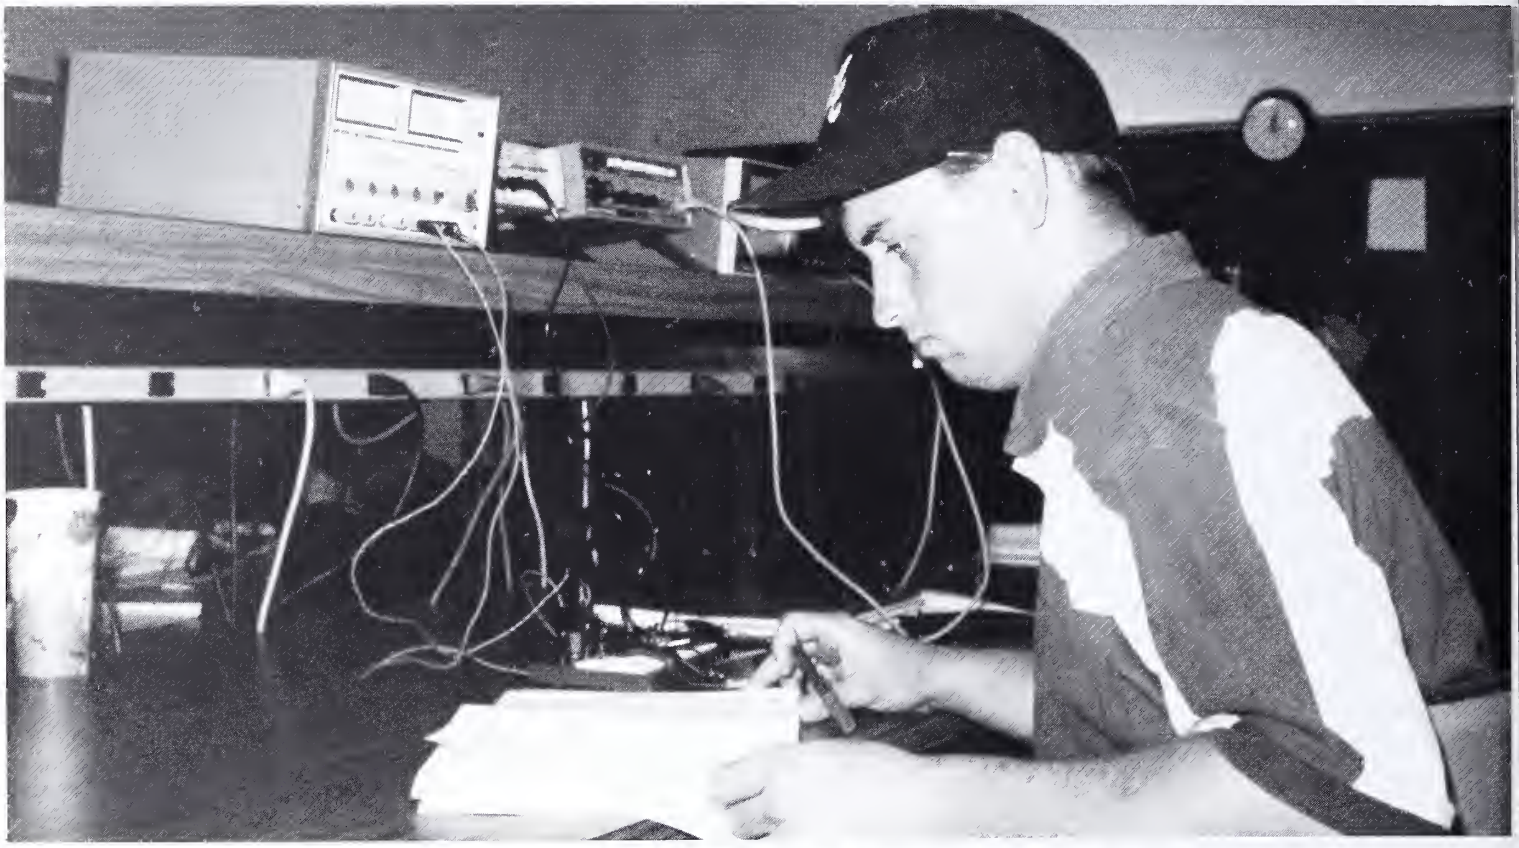
This program provides the student with an understanding of the concepts, principles and techniques of programming electronic digital computers. Graduates of the program are prepared to be entry level programmers.





# ELECTRONICS ENGINEERING TECHNOLOGY

This program uses classroom and laboratory experience to prepare graduates to work in the electronics field. Graduates are prepared to apply electronic principles and theories to layout, build, test, trouble shoot, repair, and modify electronic equipment.



# ENGINEERING GRAPHICS TECHNOLOGY

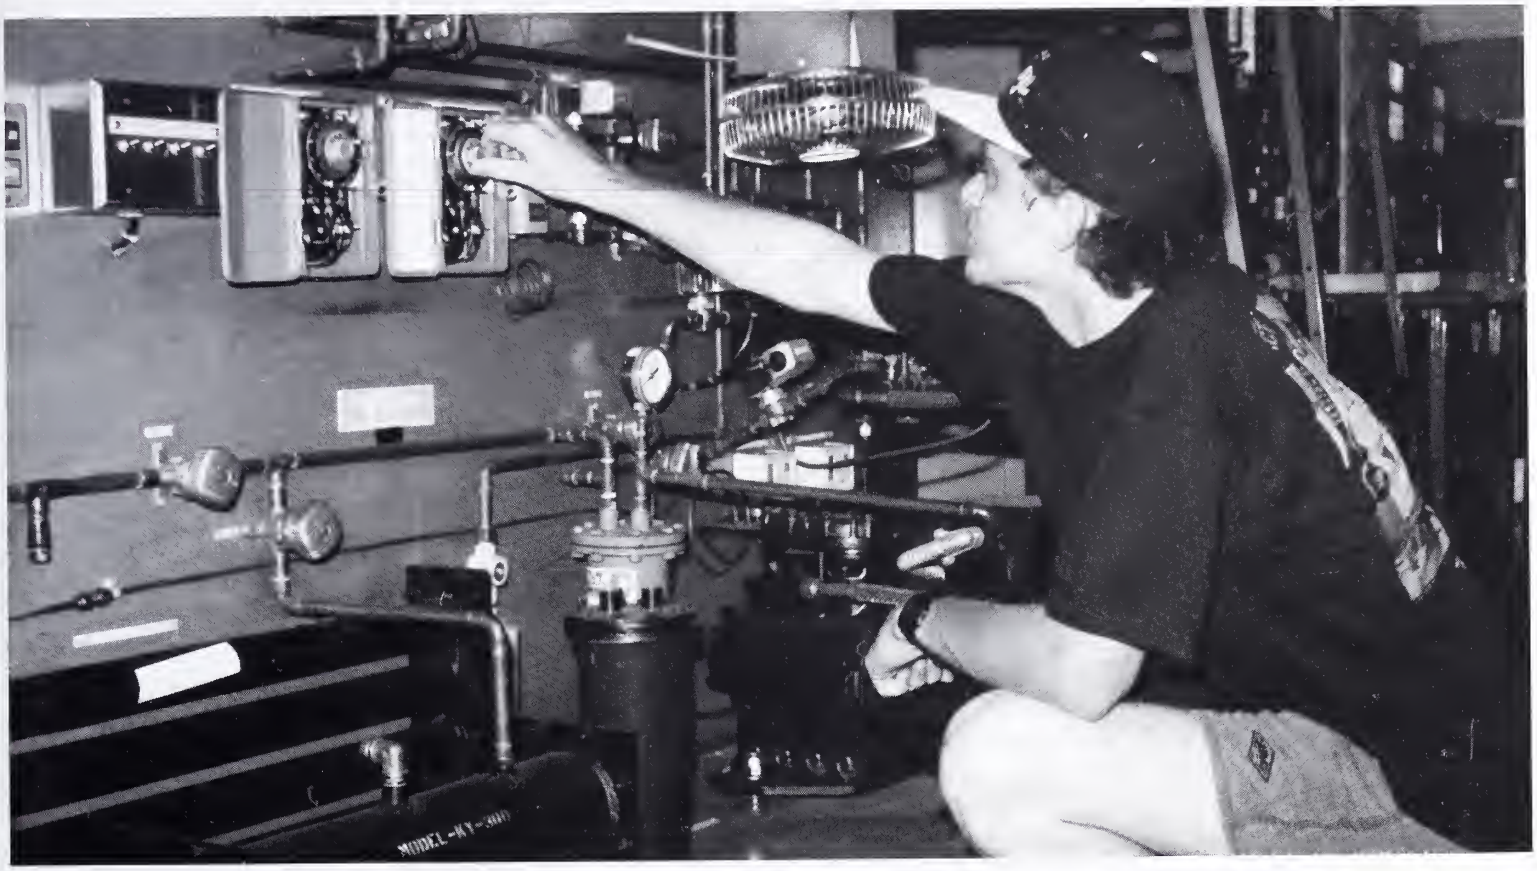
This program trains graduates to perform drafting and design functions. Graduates may be employed in a variety of industries involved in the production of products and in construction.

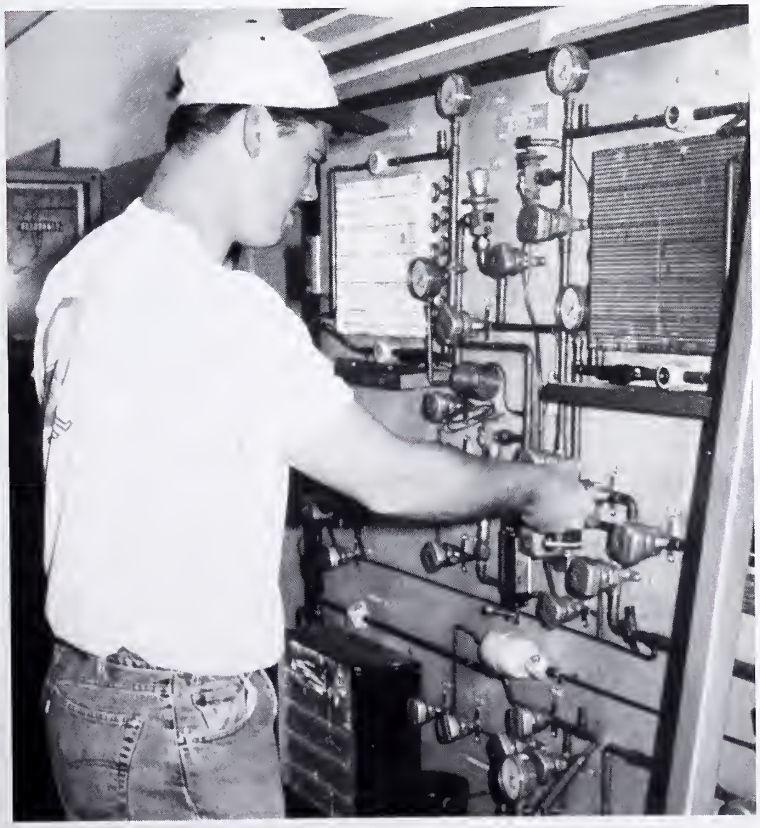
# FASHION MERCHANDISING

This program uses classroom, laboratory, and work experience to prepare students to be retailers or purchasers of soft goods. Graduates are prepared for a wide variety of entry level retailing positions.

# *HEATING, VENTILATION, AND AC TECHNOLOGY*

HVAC students will learn the theory and operation of electric, gas, and oil furnaces, window air conditioners, heat pumps, refrigerators, freezers, coolers, and walk-in boxes. Students also learn to trouble shoot, repair and maintain all of the systems as well as how to install residential and commercial equipment.



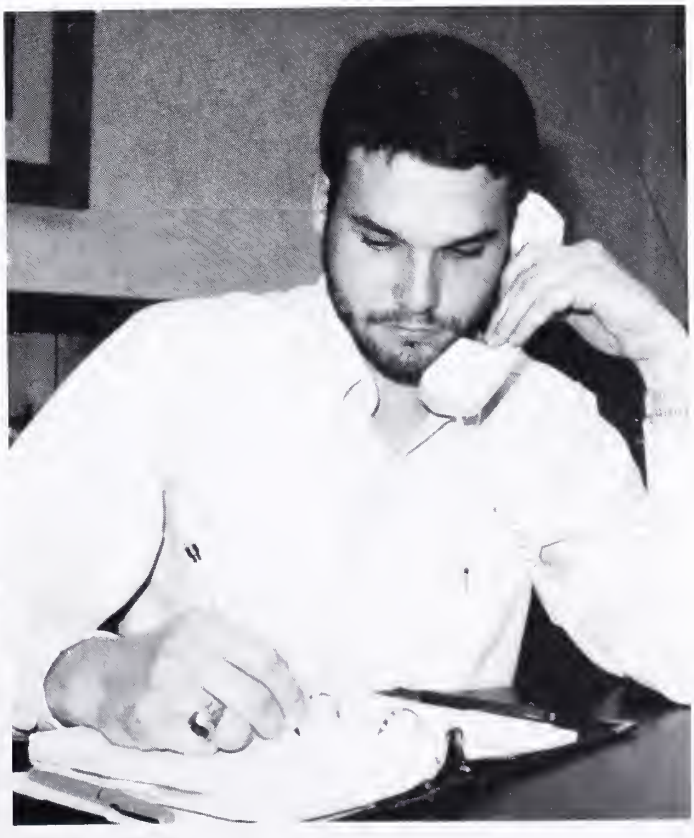


# INDUSTRIAL ELECTRICITY/ELECTRONICS

This program uses classroom and laboratory experience to provide graduates with technical, communication, and mathematical skills. Graduates are employed as electrical maintenance technicians, instrumentation technicians, and in electrical/electronic sales and service.

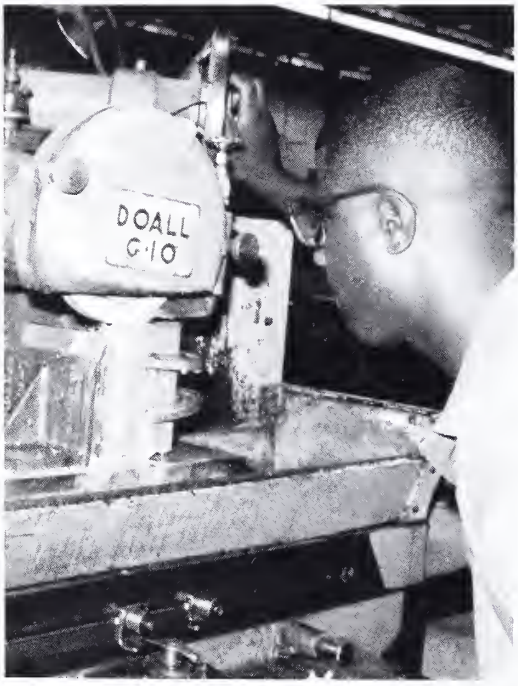
# MARKETING

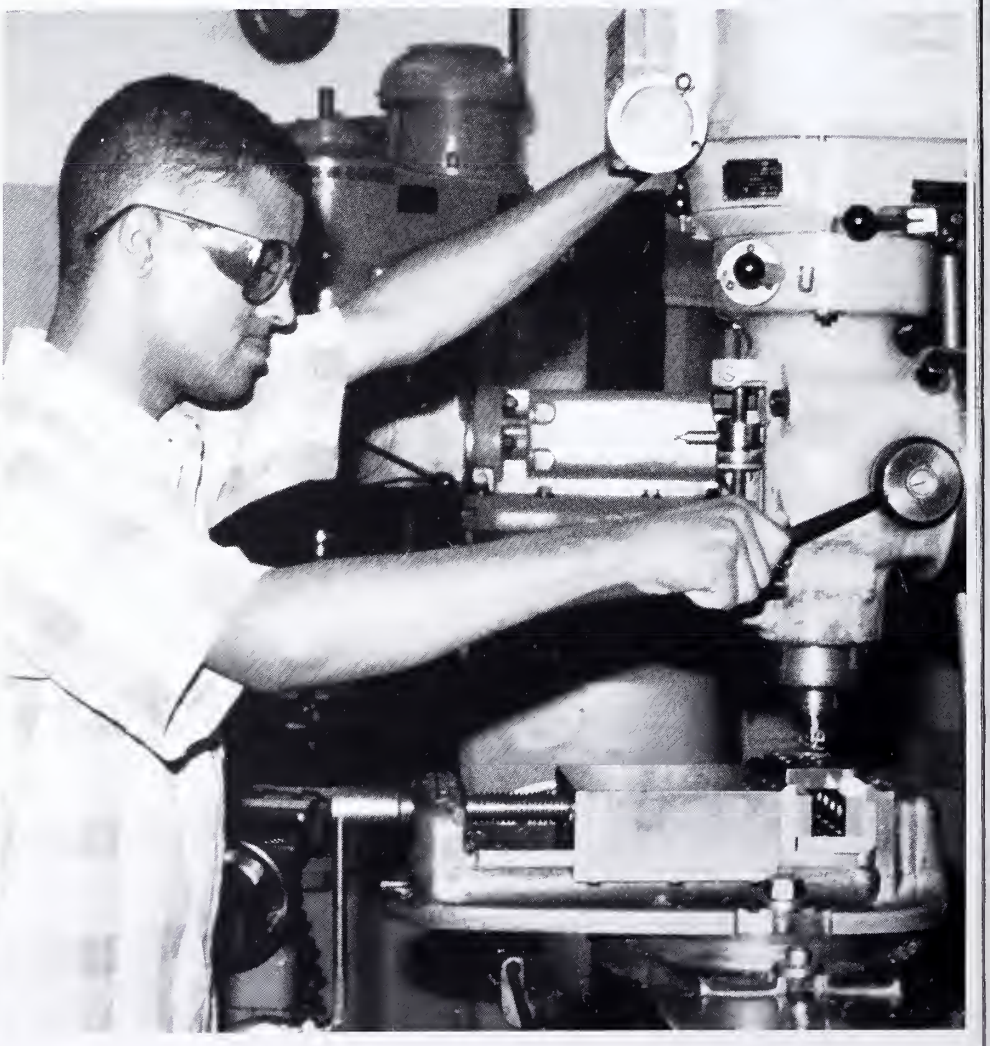
This program provides the students with technical skills, marketing know-how, material requirements, and business language. Graduates are prepared for a wide variety of entry level marketing jobs.



# MACHINE TOOL TECHNOLOGY

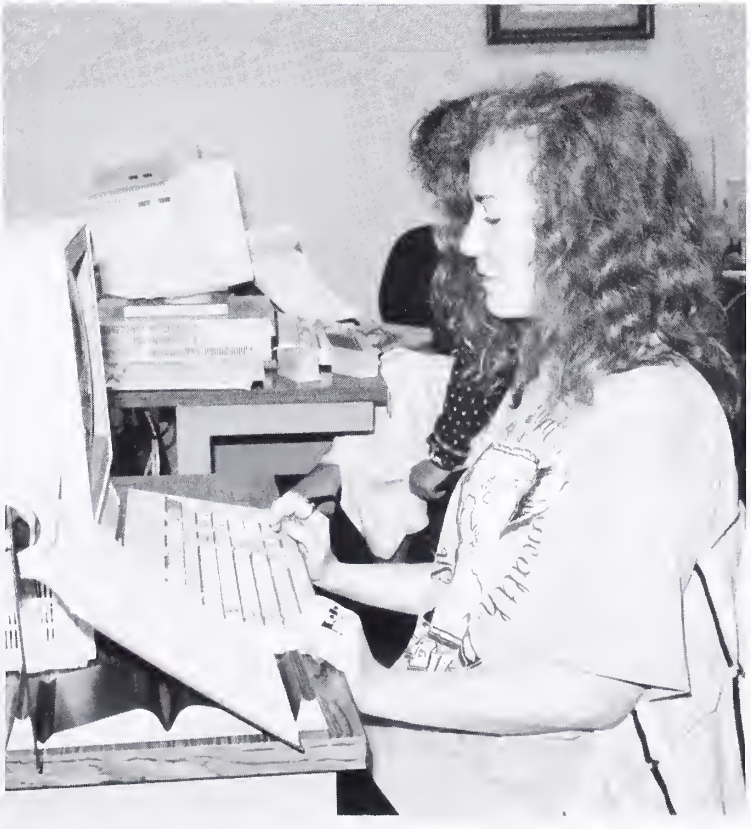
This program produces an apprentice tool and die maker basically trained in all areas of tool and die work. Employment opportunities include machinist, tool inspector, tool and die maker, methods technician, manufacturing process technician, quality and production control technician.





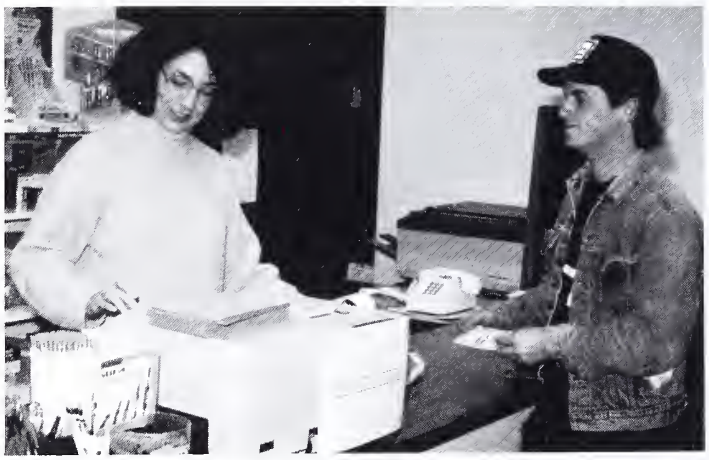
# OFFICE SYSTEMS TECHNOLOGY

This program uses classroom, laboratory, and work experience to train professional secretaries. Graduates are prepared for employment as secretaries with specialization in the executive, medical, and legal fields.



# SMALL BUSINESS MANAGEMENT

This program focuses on management with an emphasis on small business management.

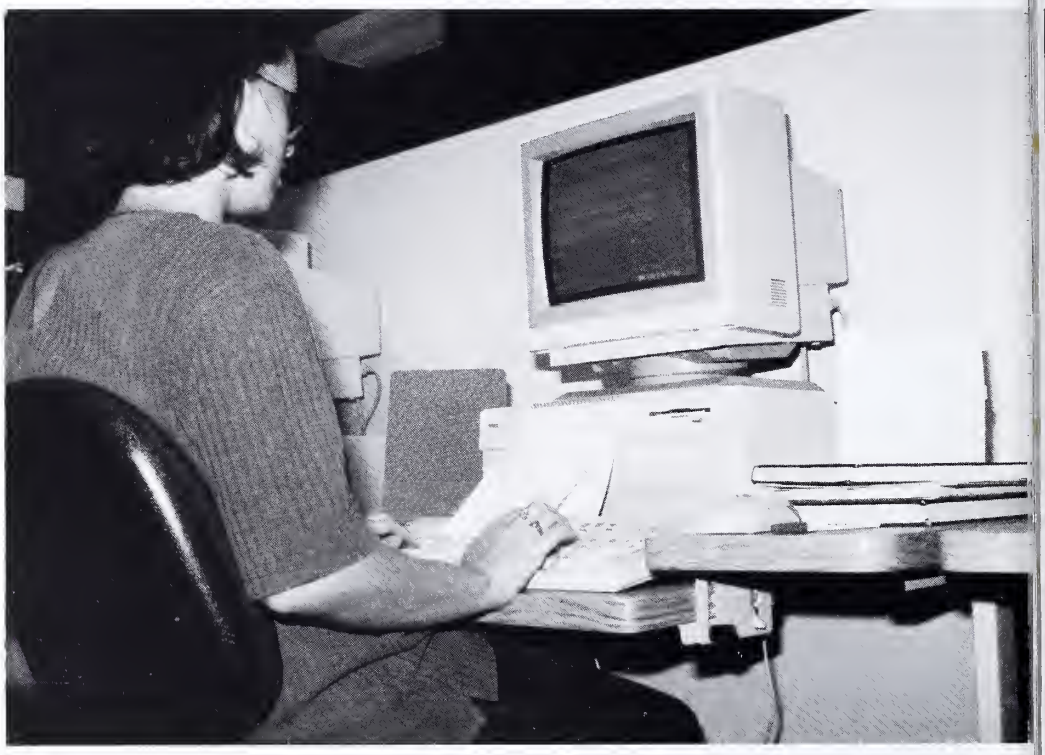


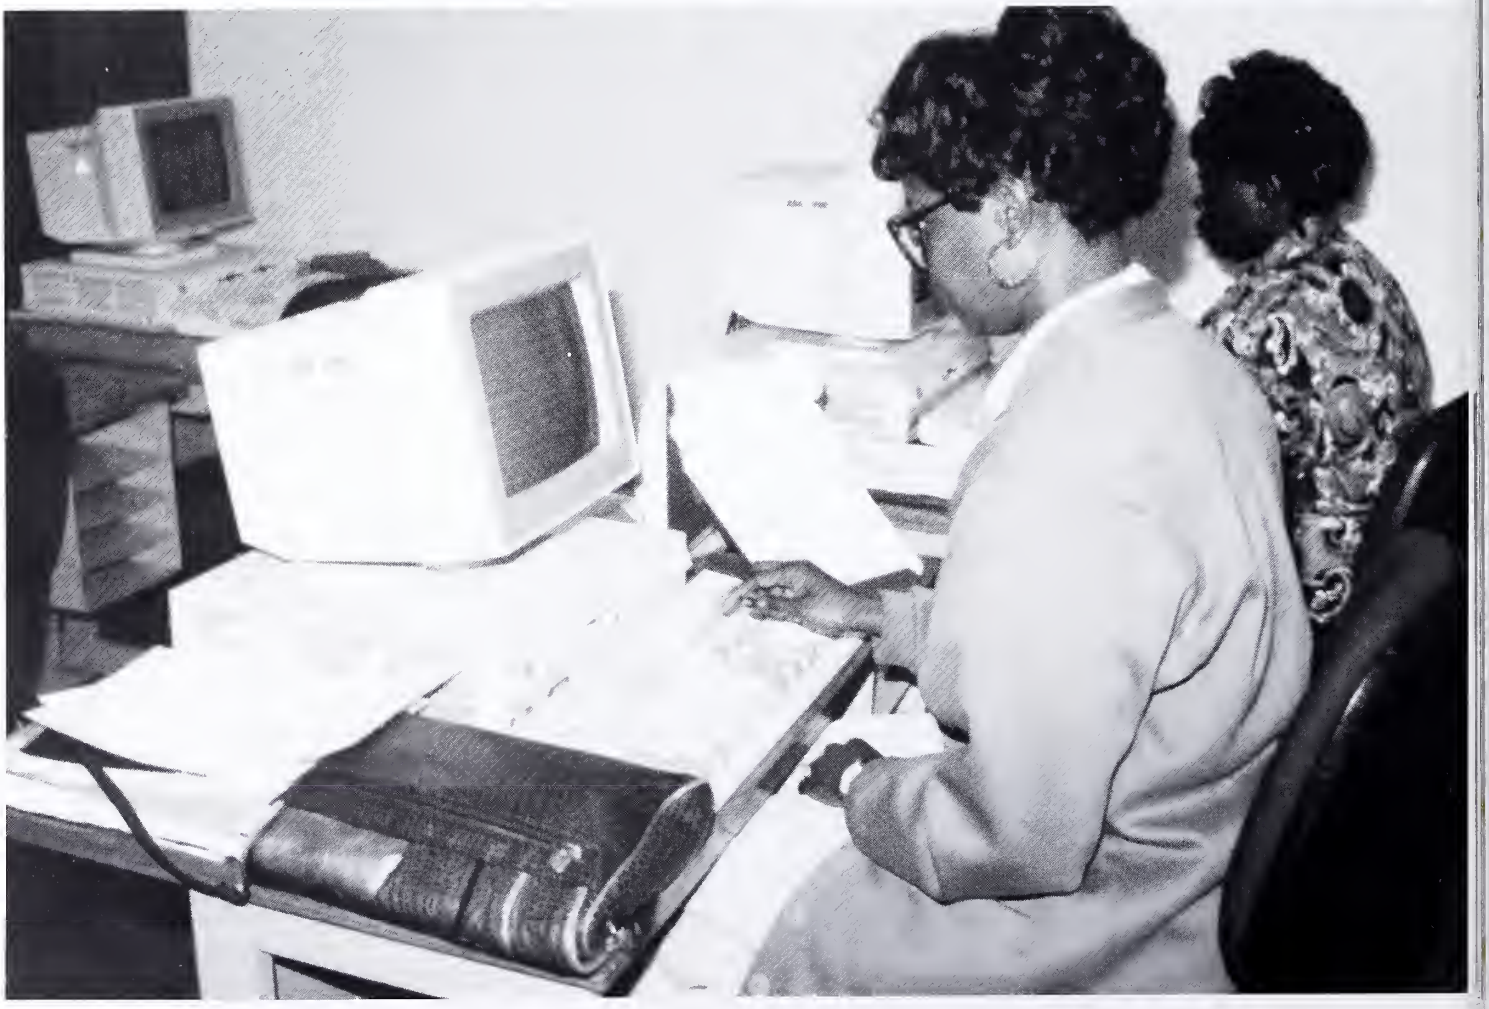
# WELDING

This program provides the principles, methods, techniques, and skills required for welders in all stages of qualifications. Employment opportunities are found in most constructional building type industries.

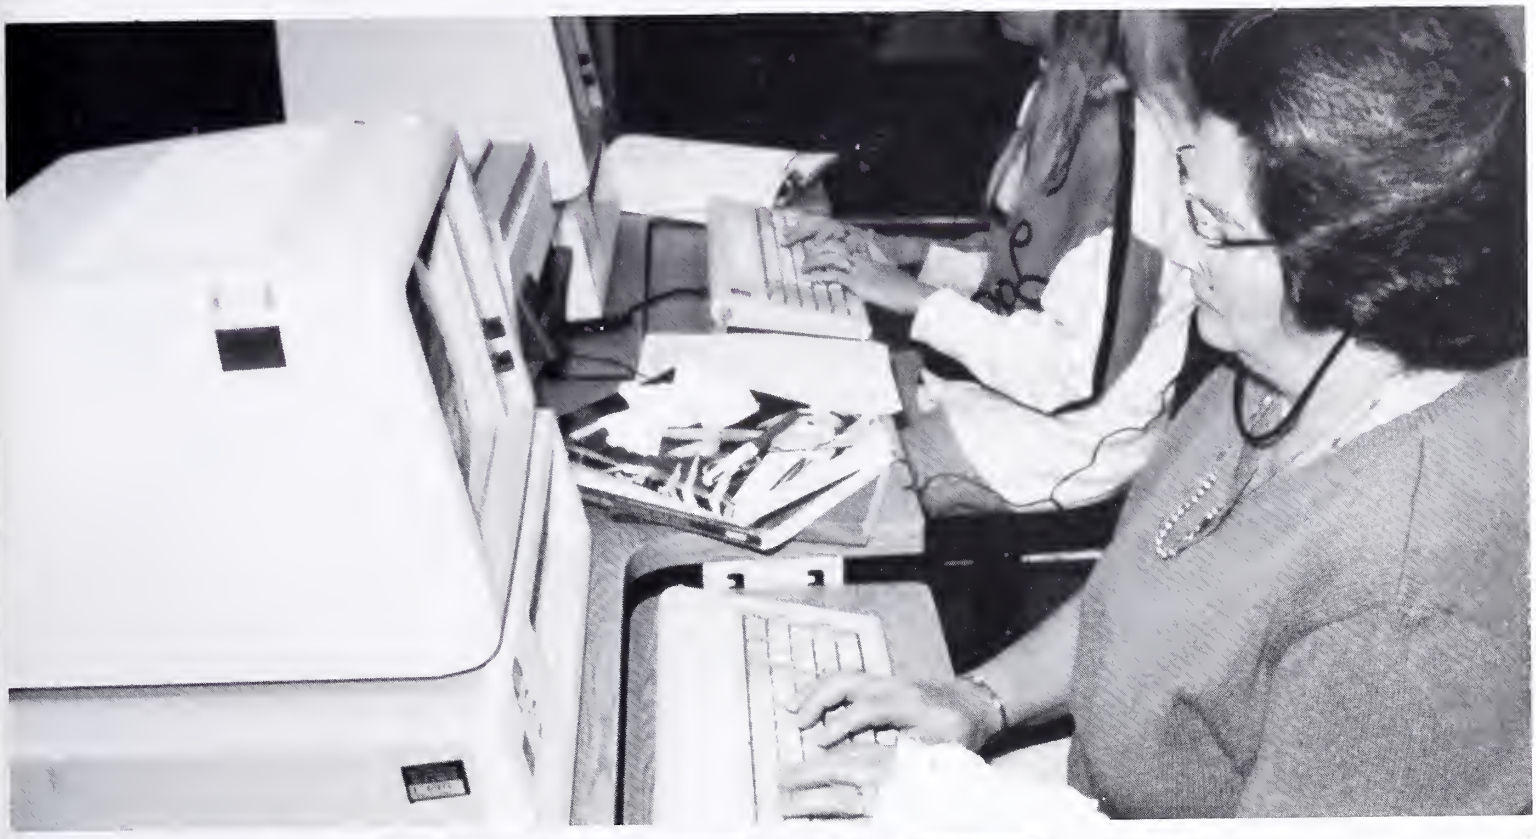
# WORD PROCESSING

This program provides the graduates with the basic skills required for word processing jobs.





# MEDICAL TRANSCRIPTION



Medical transcriptionist skills have become increasingly important in doctor's offices, clinics, hospitals, etc. A person with good basic skills who completes this certificate should have many opportunities in the rapidly expanding medical center of the Pee Dee.
